1. Available updates section. Overview

The Discount policy for update purchases.
Buying updates for the Extension gives you a 25% discount.
If during your active free support and updates period an Extension changes its License system from simple to segmented, then to get any update afterwards, you would have to purchase the new segmented version. But you will get an additional discount of the amount you paid for the simple Extension plus to the 25% one.

The list displays all available updates for the Extension, which have been issued since your purchase date.

The link will take you the log section, where updates' logs are specified.

This is the due date of your term of free support and updates for the Extension. After that date, all new updates will be visible but won't be available for free download.

Here you will see the version of the update, the date, it was issued and which Magento version the update's link is for.

The updates which were issued after your free support and updates term has been expired (6 months since the Extension purchase date) will have a 'Purchase Update' link, instead of the Download link.
Click on the 'Purchase Update' link to proceed to buying the update. If you have several updates with the 'Purchase Update' links, then simply choose the latest. All the previous updates will be available for download after successful purchase.

2. Available updates section. Purchasing update

phpFox Extensions   Magento Extensions   Customizations   Web Development

After clicking to the Purchase Update link on one of your updates, you will get to the Shopping Cart with the Extension update in it.

Remove		Product Name	Unit Price	Qty	Subtotal
		Advanced Permissions (seqm) Number of users * 3 ($129) * Free Support And Updates Service	$129.00	1	$129.00

Continue Shopping   Update Shopping Cart

When buying an update, you can only buy it for the license option with the same limitations you have at the moment (unless you've purchased an old version of the extension which had no limitations.) If you need to change the license limitations, please purchase License upgrade.

DISCOUNT CODES
Enter your coupon code if you have one.

Apply Coupon

Subtotal $129.00
Discount   -$46.76
Grand Total $82.24

Proceed to Checkout

The Discount will automatically be applied to your Shopping Cart. For Discount rules, please refer to the previous page (3).

3. Downloading purchased update

After your Order has been complete, please return to your My Downloadable Products section to the Extension, which update you have been purchasing.

> **The 'purchase' link has been changed to 'download' link. All unavailable updates also have become available for download. Since you are getting the latest version of the Extension you can also download it by the link in the 'Latest' field.**

> **Your free support and updates date has been updated adding 6 more months from the update purchase date.**

> **All future updates for the Extension, which are issued during your active period of free support and updates will automatically appear in the Available Updates section and will be available for download.**

4. Installing purchased update

Installing an update of an Extension with simple Licensing

1. Go to Manage AITOC Modules and switch the Extension off, by unchecking its checkbox and clicking save button.
2. Upload the files from the updated package to your root folder, the same way you did when installing the initial Extension.
3. Go to Cache Management and refresh your Cache.
4. Go to Manage AITOC Modules and switch the Extension on, by checking its checkbox and clicking save button.

Installing an update of an Extension, which has been switched from simple Licensing to segmented Licensing

1. Go to Manage AITOC Modules and switch the Extension off, by unchecking its checkbox and clicking save button.
2. Upload the files from the updated segmented package to your root folder, the same way you did when installing the initial Extension.
3. Go to Cache Management and refresh your Cache.
4. Go to Manage AITOC Modules and install the Extension, by clicking on 'Install' link next to its name.

Installing an update of an Extension with segmented Licensing

1. Go to Manage AITOC Modules and switch the Extension off, by unchecking its checkbox and clicking save button.
2. Upload the files from the updated segmented package to your root folder, the same way you did when installing the initial Extension.
3. Go to Cache Management and refresh your Cache.
4. Go to Manage AITOC Modules and switch the Extension on, by checking its checkbox and clicking save button.
