Purchase/Upgrade Guide

In this Guide E-Mail Templates Manager is used as example.

The Guide applies to all segmented extensions by AITOC.

TABLE OF CONTENTS

Thank you for you interest in AITOC extensions. This Guide will provide the information on how to purchase and upgrade the license for AITOC segmented extensions. License options we provide may depend on the number of Stores, Admins or Products on your Magento. Please read the comments on each product page located under the options dropdown before making a purchase.

Please refer to the License Agreement available on each product page for more information about Segmented Products.

1. How to purchase the Module

The License option you select during the purchase can be upgraded at any time. Please refer to page 7 of this Guide for details.

When AITOC extension comes with different License Options, there is a drop down list of options available on the Product Page. In the dropdown you are to select the number of units (Stores, Admins or Products) that you need. Please read the description line that comes under the dropdown for specific details.

The License will work only for one Magento software (installation). If you would like to purchase an extension for 2 or more different Magento installations, set the necessary Quantity. If you specify more than one, they will be automatically separated into different packages in the Shopping Cart, where you will be able to choose different License options.

Each option has its own price. The higher the option, the cheaper is the price per unit (i.e. Store, Admin or Product) .
There is an option between the last number and Unlim that allows you to enter a specific number of units (Stores/Admins/ Products). In this case, it's the "3+n" option. If you select it, an input field will appear, where you can enter the number, which has to be larger that the previous available option. In this case, more than 3.

1. How to purchase the Module

The quantity can be edited as well. If you decided to purchase the Extension for more than 1 Magento installation, set the desired quantity and press 'Update Shopping Cart' button

Here you can edit the chosen quantity of stores in your License

1. How to purchase the Module

Solving more of your problems. Fast.
